

Site Design

Commercial/Institutional Site Engineering

Residential Subdivisions

Recreational Facilities

RHMG Engineers is a leading provider of civil engineering services to public and private clients for commercial, institutional and residential site design. RHMG's site design services incorporate all aspects of civil engineering, including street and road design, grading, drainage and stormwater management, erosion control, landscaping, trails, wetland investigations, preservation of natural resources, site assessments and where applicable, water distribution and sanitary sewer collection systems. Our knowledge of regional regulations and ordinances and the successful relationships we've made with governmental and regulatory agencies allows us to quickly identify the unique issues that may impact a project, and to develop innovative and cost-effective solutions to meet our clients' needs. RHMG's proven project approach provides seamless and efficient coordination with our clients and their planners, architects, and contractors from project inception through construction.
