

Stormwater Management

RHMG's team of experienced engineers offers a wide array of stormwater management services, including stormwater master planning, flood control studies, hydraulic and hydrologic modeling, stormwater and drainage system design, plan review, construction administration and inspection, permitting, and grant funding. RHMG is experienced in the interpretation, fulfillment, and enforcement of FEMA, EPA, ACOE, IDNR/OWR and local regulatory programs. Our team includes certified stormwater enforcement officers, designated erosion control inspectors, and certified floodplain managers. We are guided by a design philosophy that balances project requirements and costs with environmental protection. We provide our clients with effective and economical solutions that focus on key issues and meet or exceed performance and regulatory criteria.

SERVICES

- Comprehensive Plans
- Hydrologic and Hydraulic Analyses and Modeling
